## **Kenyan Companies**

#	Company	Sector	Company Description	Looking for
K1	Pazada Ltd Farm	Dairy	Commercial maize farming, French beans (has contract for export), poultry and dairy cows (looking to expand to 150). The farm is currently improving animal genetics (cows) and has good market access (contracts)	They are looking for ways for automatization of their dairy unit, for example, suppliers of milking machines. In addition, the farm would greatly benefit from a strategic investor.
К2	Abma Farm	Dairy/ horticulture	Owned by an IT specialist and covers 400 acres. Have a good local market, looking to expand to other regions. They have 50 dairy cows and a complete milk processing plant. They are also producing vegetables and flowers and have a dehydration plant.	Looking for an investor who can help revive the milk processing plant and the vegetable dehydration unit. The milk processing line only needs little rehabilitation.
К3	Antennae Holding LTD	Horticulture	Farm/ fruit plantation, 70 acres apple mangoes (over 3000 fruit trees, 100 fruits production per tree). Export to the Middle East and the local market, looking to export to Europe. Has contracted small scale fruits growers to supplement their supply.	Get global certification and venture into Dutch market. Looking for European buyers of fruit and veg and for the local market they would like to engage in processing with those fruits that don't meet export quality.

К4	Lachuta Farm	Horticulture	100 acres, one of the largest vegetable greenhouse farms in Kenya. Specialized in vegetable production (mainly onions), tomatoes, capsicum, broccoli, lettuce, potatoes etc. Open fields and green houses.	They are interested in learning of ways to maximize productivity.
К5	Shilloh Ltd.	Horticulture	Specialized in soya beans (for export) and Irish potatoes. 63 acres of farmland with fertile soils. Also produces carrots, onions and garden peas. Are in the process of supplying potatoes for chips processing.	Requires technical support for growing soya beans as well as developing an outgrower scheme to boost their volumes. The owners have good experience in the marketing of soya but less in growing it on their own.
К6	Thome Farm	Horticulture	70 acres, specialized in, vegetable and fodder production. Produce onions, capsicum and tomatoes & hay. They use innovative agricultural technologies, have access to fertile soils and a reliable water source	Is looking for technology/ technical incentives to enhance their irrigation system (and water supply) and install renewable and bio-energy from the vast resources they have.
К7	Wamu Investments	Horticulture	They produce and export fresh fruits and vegetables (green peas, snow peas, haricot verts, baby corn, sugar snaps, chilies, broccoli and more to Europe and Middle East. Have a warehouse in Nairobi for export and 3 farms for export production to complement the produce that they collect from their outgrower program.	They are looking for buyers of fruit and vegetables. In addition, they are looking for staff training and developing standard operation procedures for improvement of the farms.
К8	ZamZam Farm	Horticulture	Farm in Kitengela in horticulture producing French beans, onions, tomatoes and capsicum. They also have 2 greenhouses and 20 dairy cows on the farm.	They are looking to enhance efficiency and find the right staff.
К9	Leila Farm	Horticulture	Leila farm is in Loitoktok, Kajiado and is cultivating tomatoes, onions, chills, watermelon and capsicum.	The Farm is looking for support in capacity building and enhancing efficiency.

К10	Alex Farm	Horticulture	Located in Kiwezi, Makueni, owned by an engineer. Horticulture: Mixed farm mainly doing tomatoes, onions, water melon. Farm also starting to do some dairy.	Looking for smart technology and new markets.
K11	Agrismart Ltd	Horticulture	80 acres, involved in fruit & vegetable production, coffee and dairy. Venturing into herbs farming. Has supply- contracts with Vegpro and schools.	Needs technical assistance on farm management, layout application of modern methods and financial assistance.  They are looking for a market for their products and technology.
К12	Orange Rock Gardens	Livestock (poultry, pigs, dairy, fish)	8 acres all in production, specialized in the poultry sector (8000 broilers, shifted from layers to broilers and looking to expand to 10.000 in 2017). Also has a dairy, pig and fish unit that they want to expand.	They are looking for finance to expand.
К13	Chesowos Ltd.	Maize (seeds)/ Dairy	Mixed- value adding farm with 788 acres of lang. Producing maize seeds, commercial maize & other veg, 170 cows, producing 800 litres per day. Have plans to pasteurize and package their own milk.	Would like to increase technical expertise. Looking for software for automated & optimized farm operations. Would like to invest in a new barn, & their focus is to find a strategic investor that can help them revive their milk processing business.
K14	General Foods	Poultry/ Horticulture	Poultry (layers) with 6000 chicks and planning for expansion. Recently they have ventured into herb farming for export. They have access to direct markets, technical expertise and a broad network	General Foods is looking for access to finance at low interest rates and they are looking for a market for their products. They are also interested in renewable energy, mainly biogas.
К15	Thuta Farm	Horticulture / dairy	Horticulture: 1 hectare greenhouse for growing mainly tomatoes and capcisum and production of bananas for the local market. Other horti products include kales, spinach and onions. Dairy: a 50 capacity dairy unit.	Looking for staff capacity for greenhouse production.
