THE AGRICULTURAL SECTOR IN GUINEA IS BLESSED WITH RICH AGRO-CLIMATIC CONDITIONS

- Favorable tropical climate
- Guinea is endowed with 6.2 million hectares of land, less than 25% of which are annually cultivated.
- Guinea has a 6,250km-long river network, including 1,161 waterways and 23 river basins.
- Guinea has 364,000 hectares of irrigable land, but only 30,200 hectares are currently irrigated.

THE GOVERNMENT IS DETERMINED TO REFORM THE SECTOR

- Adoption of the national politic to develop the agricultural sector. The main objective is to create a modern, productive, durable and competitive agricultural sector.
- Wide opened door to private investment and PPP in order to reach those goals especially in terms of production, sales and agricultural vulgarization.
- Adoption of the National Agricultural Development Politic (PNDA), and a politic for the development of fisheries and agriculture,
