VIV worldwide is the business network linking professionals from Feed to Food, combining VIV trade shows, VIV Online 24/7 and VIV trade summits. VIV developed with dedication a worldwide network through 40 years of experience and interactions with the industry, becoming today the leading platform in the most important markets of the world, and the no. 1 international trade show from Feed to Food in Asia!

Food Engineering at VIV Asia 2019 is a multi-species concept dedicated to poultry meat, egg processing and handling, red meat, fish, shrimps, and dairy products.

VIV Asia 2017 hosted over 60 companies related to slaughtering and processing, while **16.6% of the total visitors** in 2017 indicated slaughtering and processing as a sector of high importance.

Now VIV Asia 2019 adds **further processing** exhibiting companies to its family to complete the value chain. The exhibition **space** that is reserved for Food Engineering has **doubled**, compared to the slaughtering & processing section of VIV Asia 2017.

Over 100 global suppliers will showcase their equipment, products and services in further processing, logistics and refrigeration (cold chain), and packaging.

TOWARDS THE FUTURE OF FOOD ENGINEERING
