

# NAMIBIA GREEN HYDROGEN RECEPTION

On the **24<sup>th</sup> of April 2026 (14:30–17:00)**, the **Netherlands Enterprise Agency (RVO)** and **NABC** will co-host a **Networking Reception** in The Hague, uniting Dutch companies, stakeholders, and partners in green hydrogen and related sectors, with a special focus on Namibia.

The event will foster light networking, community engagement, and insights into the Combi-Track initiative - a Dutch government programme accelerating green hydrogen development in Namibia and South Africa. With Namibia's abundant solar and wind resources and its 2050 carbon-neutrality ambition, the country's green hydrogen sector is rapidly expanding, offering investment, innovation, and sustainable growth opportunities through strengthened Dutch-Namibian collaboration.
